PRACTICAL 7: TRANSFORMER SUMMARIZATION + ROUGE EVALUATION

```
# --- Step 0: Install dependencies --
!pip install -q transformers datasets rouge-score evaluate accelerate sumy nltk
import nltk
nltk.download('punkt')
nltk.download('punkt_tab')
import numpy as np
import evaluate
from datasets import load_dataset
from transformers import (
    AutoTokenizer, AutoModelForSeq2SeqLM,
    Seq2SeqTrainingArguments, Seq2SeqTrainer,
    DataCollatorForSeq2Seq, pipeline
)
MODEL_NAME = "facebook/bart-large-cnn"   # already pre-trained for summarization
```

```
[nltk_data] Downloading package punkt to /root/nltk_data...
[nltk_data]   Package punkt is already up-to-date!
[nltk_data] Downloading package punkt_tab to /root/nltk_data...
[nltk_data]   Package punkt_tab is already up-to-date!
```

```
# --- Step 1: Load tokenizer and pre-trained model --
tokenizer = AutoTokenizer.from_pretrained(MODEL_NAME)
model = AutoModelForSeq2SeqLM.from_pretrained(MODEL_NAME)
```

```
!pip uninstall -y transformers
!pip install -q "transformers==4.57.1"
```

```
Found existing installation: transformers 4.57.1
Uninstalling transformers-4.57.1:
  Successfully uninstalled transformers-4.57.1
```

```
# --- Step 2: Quick abstractive summary WITHOUT fine-tuning (baseline) --
summarizer = pipeline("summarization", model=model, tokenizer=tokenizer,
                      device=0 if __import__("torch").cuda.is_available() else -1)
sample_article = """
Researchers at a leading university announced a breakthrough in battery technology this week,
unveiling a new solid-state battery design that can charge to 80 percent capacity in under
ten minutes while retaining more than 90 percent of its capacity after 1,000 charge cycles.
The team says the innovation relies on a novel ceramic electrolyte that is both safer and more
energy-dense than the liquid electrolytes used in current lithium-ion batteries. Several major
electric vehicle manufacturers have already expressed interest in licensing the technology,
though the researchers caution that scaling the manufacturing process to an industrial level
could still take several years. The findings were published in a peer-reviewed journal and have
been independently reviewed by other scientists in the field, who called the results promising
but noted that real-world durability testing is still needed before the technology reaches
consumer vehicles.
"""
